Some product`s

CREAMRACER

Rennsimulatoren

- Race simulators
- TFT-LCD screen bracket
- Racks designed with aluminium or VA-steel
- Office furniture
- Accessories

In 2002, after 13 years of experience in service, out of my father`s factory I have established the company Metalvogue. Metalvogue has developed quickly in the market, becoming a flexible and dependable supplier in the sector of Turning, Milling and Aluminium profile processing.

We do not just process personalised drawings but also complete assembly units on request.

In our manufacturing, several different products require the usage and proficiency of various sectors. Therefore we are able to run up the requirements of our customers thanks to our knowledge and experience.

Giving a look at our range of machines, one can see that we are using a CAD/CAM system. This helps to create complex units quite economically.

Since the 01.10.2007, the legal form changed into a GmbH.

In Kerpen (Sindorf), we are managing a 450 square meters indoor processing area and a further 650 square meters outdoor area.

Small on the Wall - TFT/LCD Screen bracket

By using this bracket, only 10mm separate your screen from the wall. Because of the shape of trapezium, a strong hold is guaranteed. This bracket is made of aluminium with an amazing design because of its anodized surface. It matches to every screen with Vesa- screwing 50; 75 and 100.

Dreh- und Fräsdesign

T- Bone - Wall rack

In the basic version , this shelf system consists of 4 glass boards (180mm x 600mm). As it is a plug-in system, you can extend this product according to your personal requirement.

Dreh- und Fräsdesign

Dreamracer

Regarding this, it is our race simulator, you can purchase, or rent (including educated staff) for events, like trade fairs, introductions of products, etc.

You will get more informations about this product in our webside www.metalvogue.de.

In addition you have got the option of a test drive in our company after a date agreement.
